

Occupational Health Services

An Occupational Medicine Program That Works For You!

Now there's a workers' compensation treatment program that shares your goal. Desert Oasis Healthcare's Occupational Medicine Program helps your injured employees return to work safely and quickly.

Our entire program is dedicated to getting your employees well and back to work; from providing care promptly to maintaining communication and following up on the employee's progress. We know employee morale plays an important role in recovery. Injured workers who feel they have received quality care return to work far more quickly than those who have doubts about their care. Our goals are to reduce your worker's compensation costs and improve the health of your employees.

Each business has special needs and concerns. Desert Oasis Healthcare will customize a program especially for your company. This involves everything from a pre-placement physical to a protocol for treatment of job related injuries. If you would like more information, we invite you to contact the Occupational Health Services Supervisor, Patricia Nelson at the Palm Springs office, **(760) 320-8814, x1271**.

Our medical services include but are not limited to:

- eScreen drug testing www.escreen.com
